MICRONEEDLING + PRP

(Platelet Rich Plasma)/ RF(Radio Frequency)

SkinPen Microneedling

Reduce signs of aging by stimulating collagen with your skin's natural cell repair process. "Best in series of 3-6 depending on skin condition and severity of skin concerns.

\$575 / treatment

SkinPen Microneedling + PRP (Platelet Rich Plasma) Microneedling using the Skinpen combined with PRP can produce incredibly dramatic

effects. In cases of maximum results, the skin looks more even, has better tone, and has improved texture. Many patients obtain a more youthful, appearance in as little as 3-4 treatments. The addition of PRP also helps to potentially speed up the healing process as well as stimulate skin renewal, and in some cases has been found to address melasma issues for certain patients. Overall, the combination of microneedling and the PRP produce better results than skinpen microneedling alone.

\$775 / treatment

Vivace

Vivace uses radio frequency (RF) and microneedling to deliver immediate, long term results with a minimal discomfort experience and no downtime. Radio Frequency energy is used to heat the deeper layers of the skin while the microneedling is used to create tiny micro punctures. The combined therapy can stimulate collagen production and tighten skin providing an overall improvement in texture and tone as well as reducing facial fine lines and wrinkles.

\$775 / treatment

Vivace + PRP(Platelet Rich Plasma) Unlike other microneedling treatments, Vivace Microneedling uses RF(Radio Frequency) energy as well-all combined into one aesthetic tool. This thermal RF energy supercharges the healing process deep within your skin, prompting the production of even more collagen and increasing the moisture level in your skin. Combined with PRP, you will see a dramatic improvement in the tone and condition of your skin. Your skin will be tighter and smoother, and your complexion will look better overall. Since microneedling, RF energy, and PRP can target the signs of aging, you will also see that your fine lines and wrinkles are typically less visible. It is a non-surgical, convenient treatment. There is no real downtime after the procedure, making it convenient for people with busy schedules.

Evebrow Microblading

Microblading is a tattooing technique in which a small handheld tool made of

Clear + Brilliant & IPL Combo

Combining these two lasers gives skin the best of both worlds when addressing overall texture and appearance. These treatments used in conjunction soften out fine lines and wrinkles while also working to reduce pigmentation caused by sun damage, rosacea, and acne scarring.

\$575/treatment

TREATMENTS

COMBINATION

Veingogh & IPL Combo

A two-pack punch to treat redness and facial veins. This combination treats the fine, stubborn spider veins around the t-zone and resistant areas such as the nose. IPL is used to treat the larger general area, and Veingogh fine tunes the treatment by zapping away the remaining tiny, resistant veins

\$575/treatment

Organic Non-Acid Peel & Microdermabrasion

The peel exfoliates and cleanses the face first, which allows the Microdermabrasion to enter treatment-ready skin. This special combination allows for a deeper level of penetration and absorption of the treatment.

\$250/treatment

LASER HAIR REDUCTION

Laser Hair Reduction

Highly targeted pulsed-light technology destroys the structures that grow new hair, while the Advanced Contact Cooling technology promotes client comfort. 6-8 sessions per area is recommended.
